- Across the Board** Equal bets to win, place and show on a single horse.
- Exacta** Pick the horses that come in first and second in a race in exact order.
- Trifecta** Pick the first three finishers in a race in exact order.
- Superfecta** Pick the first four finishers in a race in exact order.
- Daily Double** Pick the winners of two consecutive races.
- Pick 3** Pick the winners of three races in a row.
- Pick 4** Pick the winners of four races in a row.
- Pick 6** Pick the winners of six races in a row.
- Parlay** Pick horses to win, place or show from consecutive or non-consecutive races. If your first selection wins, your winning amount will automatically be bet on your next selection. You can parlay up to six races. You collect when **all** of your selections win.

## Wagering Options

Instead of making individual wagers, you may want to box, wheel or key (partial wheel) a horse. This costs more, but increases your number of outcomes and your chance of collecting.

### Box

When you Box a bet, you collect if your selected horses finish in **any** order. In an Exacta Box, you combine your picks to finish first or second in every possible combination.

For example, a 1-2-3 Exacta Box covers the following combinations: 1-2, 1-3, 2-1, 2-3, 3-1, 3-2.

Trifecta wagers can also be boxed. Again, you pay per combination. To calculate how much you will pay, use this simple formula: **Your cost = \$ Amount of wager x # of bets.**  
Example: \$1 Trifecta Box with 4 Horses = \$24

### Wheel

A Wheel combines one horse with **all** the other horses in the race. An "Exacta Wheel #7 with all" covers the following combinations (in an eight horse field): 7-1, 7-2, 7-3, 7-4, 7-5, 7-6, 7-8. If this was a \$2 bet the total cost would be \$14.
